Professional Summary

Computer Science student and full stack and mobile developer with experience at Brazil's Federal Data Processing Service (SERPRO), working on blockchain and decentralized identity solutions, and at Ânima Educação, developing web applications with Vue.js and TypeScript. Experienced in building APIs, React and Flutter applications, Keycloak authentication (OAuth 2.0/OpenID Connect), relational and non-relational databases, and Docker environments. Contributes to collaborative products and maintains open source projects published in the npm ecosystem.

Professional Experience

Federal Data Processing Service (SERPRO) | **Software Development Intern** May 2025 – Present

- Develop and integrate REST APIs for Brazilian government systems.
- Build solutions with Kotlin, Node.js, and React within a microservices-based architecture.
- Integrate authentication and authorization using Keycloak, OAuth 2.0, and OpenID Connect.
- Work with blockchain, decentralized identity (DID), Docker, and enterprise environments.

Ânima Educação (Vortex) | **Front-end Developer (Scholarship)** Sep 2026 – Present

- Develop a web-based resume builder for university students using Vue.js and TypeScript.
- Implement and improve features and user interfaces for the Vortex platform.

AikiFlow | **Full Stack and Mobile Developer (Scholarship Program)** Sep 2025 – Jun 2026

- Developed a Flutter application and an API using Node.js, TypeScript, Express, PostgreSQL, and TypeORM.
- Implemented Keycloak authentication, role synchronization, JWT validation, and session renewal.
- Developed video, assessment, user, and dojo-location modules with Docker and security controls.

WayHub | **Software Developer (Scholarship Program)** Jul 2025 – Dec 2025

- Developed features and improvements in Vue.js for a platform used to create academic projects.

Relevant Projects

GastroGourmet | *Production SaaS Platform for Restaurant Management*
gastrogourmet.com.br

- Co-develop a multi-tenant, multi-store platform for restaurants that manage sales through WhatsApp.
- Build the NestJS backend with PostgreSQL, Prisma, Swagger, JWT, refresh tokens, and role- and feature-based authorization.
- Build the React and TypeScript frontend with TanStack Query, Zustand, validated forms, and unit and end-to-end tests.
- Containerize the platform with Docker and automate deployment to its production environment.

GovBR DS MCP + Agent Skill | *Open Source Tools for AI Agents*
MCP GitHub | Agent Skill GitHub | npm Package

- Created and published a TypeScript Model Context Protocol server for structured access to Brazil's Federal Government Design System documentation.
- Implemented MCP Tools, Resources, Prompts, document synchronization, and local text search with relevance ranking.
- Developed a complementary Agent Skill covering components, responsive behavior, and accessibility guidance.
- Built an automated suite of 70 tests covering services, parsing, search, and MCP integrations.

Financial Management | *Full Stack Mobile Application*
Backend GitHub | Flutter GitHub

- Developed a Flutter application integrated with a Node.js and MongoDB API secured with Keycloak.
- Implemented expense and income tracking, monthly recurrence, categories, history, and financial charts.
- Added CSV/OFX imports and consolidated spending analysis.

Technical Skills

Programming Languages:	JavaScript, TypeScript, Dart, Kotlin, Java, C#
Back-end:	Node.js, Express, NestJS, REST APIs, Prisma, TypeORM
Front-end:	React, Vue.js, HTML, CSS
Mobile:	Flutter, Kotlin
Identity & Security:	Keycloak, OAuth 2.0, OpenID Connect, JWT
Databases:	PostgreSQL, MongoDB, MySQL
DevOps:	Docker, Git, GitHub, Linux
Testing:	Vitest, Jest, Playwright, Flutter Test
Other:	Blockchain, Decentralized Identity (DID), Scrum, Kanban
Languages:	Portuguese (native), English (professional working proficiency)

Education

Centro Universitário Ritter dos Reis — Porto Alegre, Brazil
Bachelor's Degree in Computer Science — In progress
